Minutes of the meeting (dissemination activities)

INFOSEC 2015: The main event for Information Security in Slovenia

Minutes of the meeting, 18. - 20. November 2015

Nova Gorica, Slovenia

INFOSEK is in its thirteenth successful year of providing information security professionals from around the world an opportunity to learn about the latest trends, events and issues in information security and information risk management. INFOSEK is the most comprehensive and important forum on Information Security in the region. INFOSEK conference is the biggest event of information security in Slovenia. Company Palsit is one of leading Companies for Information Security in Slovenia. It is constituted of two departments: consulting (Security Politics) and educational department (we are organizing Conferences, courses and other events from Information Security Sphere).

The conference Infosek is organized in cooperation with the municipality of Nova Gorica.

At the conference relevant companies presented the latest solutions and achievements in the field of cyber security. Besides companies from Slovenia conference was attended by international and regional representatives. A wide range of topics is presented, protection of information systems of state authorities, banking sector, specialized software to protect against specific threats, such as protection of "cryptolocker" and so on.

The meeting was held at Nova Gorica, Hotel Perla. in Belgrade.

WELCOME

Dr. Aleksander Šinigoj, representative of the organizer made welcome speech and a short introduction expressing wishes for successful conference.

PRESENTATIONS

All speakers during these three days made presentations of different subjects. Main topics were information security and information technology, revision of information security system, information security standards, information security awareness, protection of personal data, information security in banks, implementation of ISMS, the use of social networks in companies, business continuity management, cloud computing etc.

There were two presentations that are supported by MIDT. Dušan Krkotić, representative of Ministry for Information Society and Telecommunications, held first presentation, The roll of Computer Incident Response Teams in National information security with focus on Montenegro case, second day of the conference. Third day, he also presented, Log management techniques as a safety solution for monitoring network and vision of further promoting cyber security as a whole.

OBJECTIVES

Objectives of the Workshop are exchange of the new ideas and identification of more efficient responses, that Foreign lecturers on Conference hand participants some practical experiences and theoretical knowledge. In events there were influential IT managers and other specialists of leading Slovenian enterprises on that sphere and also from abroad the region.
