Active participation

In close cooperation with the company REAL SECURITY the project partners were invited to participate actively at the international conference RISK (The future of network and security) for free.

The conference theme was directly related to the ECESM project and represented the added value to the partners' representatives. A conference brought together CIOs, CTOs, CSO from banks, retailers, telcos, government, system integrators, IT consultants and the world's top Internet security people, internationally renowned and acclaimed speakers.

Moreover, in the first phase of the project ECESM the emphasis is on the review and analysis of existing European practice for Cyber security, what was one of the main topics at the conference RISK.
