Survey results

Participants completed surveys at the end of training, about topic actuality, their previous knowledge, teacher competences, gained new knowledge and meeting trainees' expectations. It was close-ended questions, on which the participants should evaluate each category from 1(bad) to 5(excellent).

The survey results are summarised in the following Graph:

Average grade

Average grade

Category	Grade
Meeting expectations	4,57
Improvement knowledge	4,50
Teacher competences	4,21
Previous knowledge	3,21
Topic actuality	4,70

Based on shown results in the Graph, we can see that max average grade has given to the topic actuality and the min average grade has given to previous knowledge about the course topic. The teacher competences and expertise has evaluated as very well.

One part of survey contented open-ended questions, related to critics, comments and suggestions. All written comments were about necessity of organisation of these training types. Also, as interesting topics for future trainings, the participants have suggested: Digital certificates and security; Online terrorism.
