Survey results

Participants completed surveys at the end of training, about topic actuality, their previous knowledge, teacher competences, gained new knowledge and meeting trainees' expectations. It was close-ended questions, on which the participants should evaluate each category from 1(bad) to 5(excellent).

The survey results are summarised in the following Graph:

Based on shown results in the Graph, we can see that max average grade has given to the meeting trainees expectations, as also shown in comments in open-ended questions. Almost all sections got the max grade, except the previous knowledge of trainees in this area.

One part of survey contented open-ended questions, related to critics, comments and suggestions. All written comments shown that the training was very useful and interesting because they practice on real issues at training.
