Visit to Atlas Television Podgorica

Podgorica, 18th June 2015

Report

Members from the partners' universities, Marko Holbl, University of Maribor, Stefano Guarino, University Roma Tre and Ana Rakočević, Ministry of Information Technology of Montenegro were guests of the Atlas television. They have given statements regarding ECESM project and cyber security. As a part of a kick-off meeting at the Mediterranean University in Podgorica, Atlas television was informed about arriving of guests and they were interviewed about project. This interview was broadcasted at the popular family show "do 5", which is emitted at 16:55 each day and is very popular among wide population. Because of the broadcasting time this show has large audience and it reaches all levels of society, from the youngest to the oldest audience. It is very important for dissemination, because all layers of the society could hear about project and how project will affect Montenegrin population regarding cyber security.
