Survey results

Participants completed surveys at the end of training, about topic actuality, their previous knowledge, teacher competences, gained new knowledge and meeting trainees' expectations. It was close-ended questions, on which the participants should evaluate each category from 1(bad) to 5(excellent).

The survey results are summarised in the following Graph:

Based on shown results in the Graph, we can see that max average grade has given to topic actuality, meeting participants' expectations and improvement of knowledge. The min average grade has given to previous knowledge related to training topic. The teacher competences and expertise has evaluated as very well.

One part of survey contented open-ended questions, related to critics, comments and suggestions. All written comments were about necessity of organisation of these training types. Also, as interesting topics for future trainings, the trainees suggested: Ethic hacking, Digital terrorism and Online hate speech.
